SUMMARY

- **Software Development Engineer** with expertise in **distributed systems, cloud infrastructure, and backend development**. Built large-scale real-time products like **JioMeet Plus (20M+ users)** and **JioWorkspace**. Skilled in Golang, C++, and systems-level design, with proven experience in **latency reduction, sharding, observability, and infrastructure optimization**. Passionate about building performant, maintainable systems.

EXPERIENCE

- **JIO** Navi Mumbai, MH
Oct 2023 - Present
• *Software Development Engineer*
 - Engineered **Jiomeet+** (over **20 million active users**), integrated over **15-20 critical features** and refactored **legacy code**, including key functionalities such as **status management, real-time document collaboration**, and **link unfurling** using cloud functions, real-time document collaboration, enhancing collaboration experience and improving engagement by **30%**
 - Migrated and implemented **sharding** on a **500 million record collection**, boosting associated APIs performance by **50%**.
 - Contributed to the development of **JioWorkspace** a collaborative workspace application. Integrated **Keycloak** for secure authentication and handling login/logout flows.
 - Built **User Status Management** with **publisher-subscriber model** for multi-device support. Implemented a **Bloom filter**-based architecture during new account creation, reducing redundant database calls and decreasing **CPU utilization by 40%**.
 - Refactored legacy services and **improved latency by 40%**, reducing integration bugs and enabling frontend velocity.
 - Transitioned the **media engine** from third-party to a **custom-built in-house solution**, leveraging **bare-metal servers** to improve performance, reduce dependency on third-party services, and achieve greater control over media processing capabilities, with significant reduction in infra cost by **65%**.
 - Revamped **Elasticsearch** functionality by introducing a **recency-based** scoring algorithm and optimizing **fuzzy search** mechanisms, resulting in significantly faster, more accurate, and contextually relevant search results.
- **Capgemini** Remote
June 2022 - April 2023
• *Data Engineer (Intern)*
 - Built and optimized **data pipelines** using **Python** and **SQL** for processing large volumes of structured and semi-structured data.
 - Collaborated with backend engineers to integrate **APIs** and **data ingestion workflows** in a cloud-native environment.

SKILLS

- **Languages:** Go, C++, Python, JavaScript/TypeScript, Java
- **Backend Technologies:** gRPC, Node.js, Express, WebSockets, Socket.IO, RabbitMQ, REST
- **Databases:** MongoDB, PostgreSQL, Redis, CockroachDB, Elasticsearch
- **Infrastructure:** Docker, Kubernetes, AWS, GCP, NGINX
- **Architecture:** Microservices, Sharding, Pub/Sub, Real-Time Systems

PROJECTS

- **BuzzWire (Tech: Socket.io, Redis, MongoDB, HAProxy, Docker, React, WebSocket)**
 - Developed a scalable real-time chat application using **Socket.io, Redis, MongoDB, HAProxy**, and **Docker**.
 - Implemented unicast, multicast, and broadcast messaging with **Redis Pub/Sub** and ensured load balancing via **HAProxy**.
 - Optimized message caching and persistence using **Redis** and **MongoDB** for reliable low-latency communication.
 - Containerized the application with **Docker** and built a WebSocket-powered **React** UI for a seamless user experience.

EDUCATION

- **Savitribai Phule Pune University** Pune, Maharashtra
Feb 2021 - July 2023
• *Bachelor of Engineering - Computer Engineering; CGPA: 9.47/10*
- **Government Polytechnic Amravati** Amravati, Maharashtra
July 2018 - October 2020
• *Diploma in Computer Engineering; Aggregate: 83.81%*

CERTIFICATIONS

- **Oracle Cloud Database Services 2021 Certified Specialist:** Oracle University
- **Oracle Cloud Infrastructure Foundations 2021 Certified Associate:** Oracle University
- **AWS Cloud Practitioner Essentials Training:** AWS
