SUMMARY

- Backend engineer with end-to-end ownership of distributed, production-grade systems across financial and real-time platforms. Experienced with Go, Node.js, NestJS, REST/gRPC, Redis, MongoDB, MySQL, Kafka, Kubernetes, AWS, and GCP, with strengths in caching, event-driven architecture, webhook orchestration, sharding, and reliability engineering. Delivered systems for JioMeet+ serving 20M+ users and fintech infrastructure at smallcase, reducing mean time to root cause by 70% and manual triage by 60% through AI-powered tooling.

EXPERIENCE

- Smallcase (case platforms)** Bangalore, India (Remote)
Sept 2025 - Present
Software Development Engineer
 - Architected lender onboarding, pledge, and agreement systems; refactored core lending flow to be **lender-agnostic**
 - Designed and delivered distributed Redis caching, IP whitelisting, OTP management, and webhook-routing capabilities for fintech workflows, eliminating silent webhook drops.
 - Delivered a **multi-lender admin dashboard** with unpledging and cancellation workflows
 - Developed secure financial workflows for **dual-signature agreements**, achieving zero reconciliation errors.
 - Deployed **Kafka** via **Strimzi** for reliable production event streaming, resolving long-standing **race conditions**
 - Engineered an **AI-powered CAS parser** automating equity extraction and eligibility checks, cutting review time to near-instant
 - Orchestrated an **AI debugging agent** integrating **Claude**, **Elastic MCP**, and **Redash MCP**, cutting mean-time-to-root-cause **70%**
 - Pioneered **contextual AI memory** and SOP-driven agents for lender workflows, reducing manual triage **60%**
 - Partnered with **3 external engineering teams** to integrate lending platforms via APIs and webhooks, improving reliability
- JIO Platforms** Navi Mumbai, MH
June 2023 - Sept 2025
Software Development Engineer
 - Engineered **JioMeet+ (20M+ users)**, shipping 15-20 features including real-time collaboration, improving engagement **30%**
 - Integrated **Keycloak** authentication into **JioWorkspace**, enabling secure login/logout flows platform-wide
 - Improved **User Status Management** performance via **Bloom-filter** and pub-sub design, cutting **CPU utilization 40%**
 - Revamped **Elasticsearch** with a recency-based scoring algorithm and optimized fuzzy search, improving result relevance **25%**

SKILLS

- Languages:** Go (Golang), Java, C++, Python, JavaScript/TypeScript
- Backend Technologies:** Node.js, Express, NestJS, Spring Boot, gRPC, REST, WebSockets, Socket.IO, RabbitMQ, Apache Kafka, Strimzi, Keycloak
- Databases:** PostgreSQL, MySQL, MongoDB, Redis, CockroachDB, Elasticsearch
- Infrastructure:** Docker, Kubernetes, AWS, GCP, NGINX, ArgoCD
- Architecture:** Microservices, Distributed Systems, Transactional Systems, Idempotency & Exactly-Once Delivery, Sharding, Event-Driven Architecture, Pub/Sub, Worker Pools, Caching Systems, Bloom Filters, Webhook Orchestration, Retry & Backoff Strategies, Root Cause Analysis Automation
- AI/LLM Systems:** Claude, Claude Code, Cursor, Gemini, MCP (Model Context Protocol), Elastic MCP, Redash MCP, LLM Orchestration, Agentic Workflows, Contextual Memory Agents, AI-Powered Automation
- Leadership & Collaboration:** End-to-End Ownership, Cross-Functional Collaboration, Technical Mentorship, Root-Cause Problem-Solving, Cross-Domain Adaptability, Technical Initiative

PROJECTS

- TaxSphere | Kotlin, Jetpack Compose, Room, SQLCipher, Hilt, Gemini AI** 
 - Developed a privacy-first Android app parsing bank/UPI SMS on-device, achieving zero cloud data egress
 - Designed a regex template engine parsing an **8-month SMS backlog** under 60 seconds, with **Gemini AI** fallback
 - Created a tax deduction scanner across **8 IT sections** (80C, 80D, HRA, etc.) with Old vs New regime comparison
 - Implemented **AES-256 SQLCipher** encryption and on-device PII redaction before any **LLM** API call
 - Architected **Clean Architecture** across 5 layers with **15 Hilt modules** and Jetpack Compose

EDUCATION

- Savitribai Phule Pune University** Pune, Maharashtra
Bachelor of Engineering - Computer Engineering; CGPA: 9.47/10 Feb 2021 - July 2023
- Government Polytechnic Amravati** Amravati, Maharashtra
Diploma in Computer Engineering; Aggregate: 83.81% July 2018 - October 2020
